

Adobe® Acrobat® Connect™ Professional

ONLINE

Fully Integrated Audio & Web Conferencing

Adobe® Acrobat® Connect™ Professional is a rich Web communication system that lets you instantly reach your audience. Adobe® Flash® Player is used to deliver Acrobat Connect online meetings, self-paced training courses and on-demand presentations. And because Adobe Flash is already installed on more than 98 percent of browsers worldwide, your audience can access Acrobat Connect meetings and presentations instantly, without special plug-ins.

Adobe has partnered with Premiere Global Services, one of the world's audio conferencing leaders, to provide an unparalleled integration of web and audio teleconferencing. With integrated teleconferencing from Premiere Global, you have the power to take Acrobat Connect to the next level.

Adobe Connect

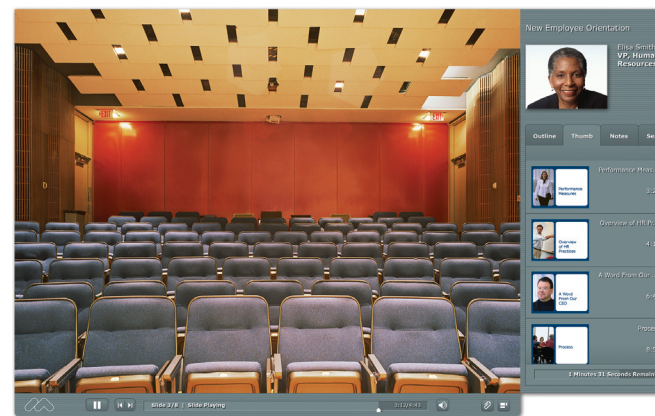

Meet.

Meet instantly with anyone to share presentations, applications, and engaging multimedia content. Acrobat Connect meeting room configurations and content are automatically saved and always available for reuse, dramatically reducing preparation time for recurring seminars, sales demonstrations, or online classes. Meetings can also be recorded for later reference. Utilize multi-point video conferencing via webcam integration. Whether you need a small conference for a few colleagues or large event for thousands of people, Acrobat Connect and Adobe Connect Events module can accommodate your needs.

Present.

Make your presentations stand out. With Adobe Presenter, you can personalize Microsoft® PowerPoint® presentations with voice-over narration and add video, animations, and simulations. Adobe Presenter converts your presentations to the Macromedia® Flash™ format and publishes them online for your audience to view at their convenience.

Presentations are automatically stored in a fully searchable content library, allowing you to improve productivity by enabling all content creators to find, retrieve and repurpose content across the organization.

Train.

Training has never been easier or faster. In conjunction with Adobe Presenter, it's easy to add a variety of quizzes, from multiple-choice to fill-in-the-blank, and results can be tracked using a convenient reports dashboard. Adobe Connect Training also provides complete curriculum management, including the ability to require live seminars, as well as self-paced courses, within a single curriculum. The content complies with AICC and SCORM standards, enabling straightforward integration with existing learning management systems.

Audio Conferencing from Premiere Global Services

Integrated teleconferencing is essential to any successful web collaborative session. Premiere Global provides integrated teleconferencing capabilities like advanced audio host controls, powerful participant management and synchronized meeting recording.

ReadyConference® Plus: Utilize the cost effective, easy-to-use solution that delivers the integrated audio features you need most for impromptu or scheduled meetings. You can also use ReadyConference Plus as a stand-alone audio conferencing service.

ReadyConference® GlobalMeet®: Along with innovative ReadyConference Plus features, GlobalMeet delivers consistent and clear audio, along with dial-in access around the world.

Integrated Teleconferencing Features

Meeting Hosts

- Initiate and terminate a teleconference with a single click
- Call participants from within the conference
- Change volume for selected participants
- Mute/un-mute participants
- Synchronized Web and voice recordings
- 24/7 Live Assistance

Meeting Attendees

- Have Acrobat Connect call them directly instead of having to dial a conference number
- Mute and un-mute their phone lines
- Active talker indicator makes it easy to see who is currently speaking

All from Premiere Global Services.
